

DATA TRANSFORMATIONS WITH MAP, FILTER AND REDUCE

Original array

3 1 4 3 2

MAP

Example
 $\text{current} * 2$

6 2 8 6 4

- map returns a **new array** containing the results of applying an operation on all original array elements

3 1 4 3 2

FILTER

$\text{current} > 2$

3 4 3

Filtered array

- filter returns a **new array** containing the array elements that passed a specified **test condition**

3 1 4 3 2

REDUCE

Accumulator
 $\text{acc} + \text{current}$

13

Reduced value

- reduce boils ("reduces") all array elements down to one single value (e.g. adding all elements together)
